

NORTH PORT HIGH SCHOOL

PROUDLY INVITES YOU TO PARTICIPATE IN

HELMETS FOR HEADS

Here are some facts regarding head injuries during football practice and games.

1. Head, face, and neck concussions **STILL** are the #1 injury in football.
2. Most of these injuries occur while a player is being tackled.
3. Head and face concussions occur in games but, just as much in practice,
4. Football has the highest rate of concussions out of all high school sports.

A player's safety is the cornerstone of the North Port High School football program. Our coaches strive to purchase equipment that is in line with this philosophy. It is not always the most cost effective but, at the end of the day, we know that we did all we could do to protect our players.

Along with the efforts of our coaches you may purchase a helmet or a portion of a helmet to donate to our football program. The cost of each helmet is \$600.

_____ I would like to purchase a helmet for a NPHS football player. (\$600)

_____ I would like to purchase half of a helmet for a NPHS football player. (\$300)

_____ I would like to donate to the NPHS Helmet for Heads program and be a part of their safety plan.

On behalf of the North Port High School Bobcat football team, we want to thank you for participating in this campaign. Please join us during our football season and help cheer on the Bobcats!

Sincerely,

Garon Belser, Head Coach
NPHS Bobcat Football
